

**Typical chemical and physical Properties** D'LUB CF is a lubricating / antistatic agent specially formulated for application on ceramic fibres during their manufacture..

### Combination of Lubricants and antistatic agents

#### PROPERTIES:

Appearance	Clear Amber Liquid
Colour	Yellow to Amber
pH ( 2% solution )	5 ± 1
Ionic Nature	Non - Ionic

---

### Applications and typical treat level recommended

D'LUB CF is applied from a 10% to 20% aqueous solution directly on the ceramic melt as it is extrude.

---

### Benefits

**D'LUB CF imparts excellent lubricity and antistatic properties which enables** The fibres to be processed smoothly in subsequent operations like needle Punching etc.
