

# Tiny ChemPro

Formulator of speciality additives

## D'LUB BL 225 PO

**Combination of polyalkylene glycols  
( Water Insoluble )**

It is a propoxylated Fatty Alcohol

### PROPERTIES:

Appearance	Crystal clear liquid
Active content	100 %
Viscosity at 40 °C	80 mm/s
Flash Point	> 230 °C
Density	0.95 – 1.0
pH	5..0 – 7.0
Solubility	Water Insoluble
Pour Point	- 35

It is a low foaming Wetting and defoaming agent which is water insoluble.

It is used in Ink , Coating, Emulsion Polymerisation, Coolents formulations.
