

D'FOAM EMS 8510 Foam Control Agent

Metal Working Fluids

Typical chemical and physical Properties

D'FOAM APS 8510 is 10% active Organo silicone-based defoamer catering to applications such as industrial cleaning, waste water treatment , Metal working fluids ,Gas Sweetening and gas Drying etc.

A Blend of Organo Modified silicane, silica, polyether silicones and surfactants

PROPERTIES:

Appearance	Milky liquid
Active content (%)	10 %
Diluent	Water
pH	7.0 ± 1.0
Specific Gravity	approx. 1.00
Ionicity	Non-Ionic

Applications and typical treat level recommended

Dosage 50 ppm to 100 ppm

Exact dosage can only be arrived at by conduction a plant scale trial.

It is recommended to use **D'FOAM EMS 8510** in its natural state directly during the let down stage or prediluted with 4 – 10 parts of water if used immediately.

D'FOAM EMS 8510 may also be distributed with a water dilution system and / or with a special metering system for automatic dosing, which means product will be automatically added only when needed.

Benefits

D'FOAM EMS 8510 performs tremendously in controlling foam generation in general chemical processing applications such as industrial cleaning, waste water treatment, Metal working fluids ,Gas drying & Gas Sweetening etc

It is very effective even at low concentrations and facilitates smoother pump operation, transport.

D'FOAM EMS 8510 leaves no residues in the pipes or valves of the equipment used.
