

Paints & Coatings

Typical chemical and physical Properties

D'COL MAR 333 is a multi purpose modified silicone additive acting as anti slip, .Mar resistant and levelling agent in variety of solvent & water borne paints. It Provides a strong reduction of surface tension of paint system and hence improve Wetting and avoid craering.

Combination of modified silicone glycol with other additive

PROPERTIES:

Appearance	Clear Liquid
Flash Point	> 72 °C
Density	> 0.90 at 25 °C
Solubility	Water & Solvent miscible

Applications and typical treat level recommended

0.05 to 0.5 % calculated on whole formulation.

D'COL MAR333 can be incorporated during any stage of production process **and also in finished product with through mixing.**

D'COL MAR 333 imparts mar & abrasion resistance by reducing surface tension and also improves flow out , wetting and gloss. It displays excellent compatibility and can be used as an anti- cratering additive.

Benefits

D'COL MAR 333 exhibits excellent mar resistance, prevents pin holding and improves gloss without imparting any negative effects in the process such as surface defects and separation tendencies.

D'COL MAR 333 does not contaminate & leaves no residues in the pipes or valves of the equipment used.
