

D'FOAM AP W 058 Foam Control Agent

Coatings, Piment Concentartes, Textiles,

Typical chemical and physical Properties

D'FOAM AP W 058 is a special <u>self-emulsifying</u> antifoam formulation for Coatings, Pigment Concntrates ,Textile Auxillaries, Cooling Lubricants and Dispersions for stripping processes.,Ink formulations. During Pigment grinding & dispersion, It Promotes quick knock down defoaming.

Combination of polymethyl/dimethyl siloxane and fillers

PROPERTIES:

Appearance Greyish translucent liquid

Active content 100 %

Viscosity at 25 °C 10 - 25 mPa.s

Flash Point > 93 °C

Density 0.93g/cm3 at 20 °C

pH 6 - 7

Applications and typical treat level recommended

0.2 to 1.0ml / litre of foaming media

Apply the product in its natural state by aspersion or by dosing pump and adjust the initial dosage according to the requirements.

D'FOAM AP W 058 can be added in the grinding stage. If added in the finished products, Care should be taken to ensure uniform distribution.

Benefits

D'FOAM AP W 058 is a 100% active product and shows excellent performance in the control of foams and maintains flowability of the end product at desired levels (in applications such as paints and coatings).

It is very effective even at low concentrations and facilitates smoother pump operation, transport.

D'FOAM AP W 058 leaves no residues in the pipes or valves of the equipment used.
