
Typical chemical and physical Properties

D'FOAM AP 4308 is an oil-soluble defoamer for coating systems such as in paper, , paints latex based coatings such as Acrylic, Butadene, Styrene and PVA emulsions& fine Particle resin emulsion.

A Blend of Hydrocarbons and Non- ionic Surfactants

PROPERTIES:

Appearance	Turbid yellow liquid
Active content	99.9 %
Solubility	- Soluble in Oil - Dispersible in water - Easily dispersible in latex paint and adhesive system.
Specific gravity	0.88 ± 0.002

Applications and typical treat level recommended

Paints, Latex coatings 0.1 to 0.5 % on weight of finished paint

If required, the amount can be raised to 1 %. Normally the defoamer is added undiluted at the beginning og the paint mixing cylce, which ensures through dispersion of the defoamer and complete deaeration of the pigment.

Benefits

D'FOAM AP 4308 is a highly effective liquid defoamer, which can be addede at any stage in emulsion paint manufacture. It is especially effective in the fine particleresin emulsion. Although it is only sparingly dispersible in water, it disperses easily in the paint, so that even in medium viscosity paint there is no tendency of the defoamer to cream to the surface.
