

D'FOAM AP DPV

Foam Control Agent

Paints, Coatings & Adhesives

Typical chemical and physical Properties

D'FOAM AP DPV is a 99.9% active defoamer for paints and adhesives based on polyvinyl acetate emulsions. It is also a versatile defoamer in manufacturing of glues and a few other applications where compatibility to a particular system is critical.

A Blend of Petroleum derivatives with proprietary additives

PROPERTIES:

Appearance	Light amber liquid
Solubility	Dispersible in water
Cloud Point (deg.C)	< 10
pH (2% solution)	6.5
Moisture	1% Max.

Applications and typical treat level recommended

Paints and Adhesives 0.2% to 1% of weight of PVA Emulsion or any similar foaming media.

Always stir well before use.

No preparation or pre-dilution is recommended prior to use of **D'FOAM AP DPV**.

Benefits

D'FOAM AP DPV is a 99.9% active product and performs tremendously in controlling foam generation in coating systems based on polyvinyl acetate emulsion.

It protects the appearance and wearing qualities of paint by preventing occurrence of foam during paint production or application.

The other benefits of **D'FOAM AP DPV** are:

- ✓ Effective in low pH systems
- ✓ Does not affect colour development
- ✓ It is totally silicone-free hence, no fish eyes or crater formation.
