

Typical chemical and physical Properties

D'FOAM AP LGK is water soluble defoamer cum levelling agent for all coating systems based on synthetic latex systems such as in paper coating, in synthetic latex emulsion for paints, adhesives & concrete additives. Levelling agent property of D'FOAM AP LGK due to viscosity reducing effects gives less pattern & smoother Surface in the dried coatings.

A Synergatic Blend of Polyalkylene Glycol with fatty Ester

PROPERTIES:

Appearance	Pale Yellow to white opaque liquid
Active content	52 ± 2 %
Solubility	- Soluble in - Easily dispersible in latex paint and Adhesive system
pH (2% soln)	7.5 ± 0.2
Ionic Nature	Non - Ionic

Applications and typical treat level recommended

Emulsion Paints	0.05% to 0.2% of weight of foaming- media
Adhesives	0.5% -1.0% of weight of Coating solid

Both Defoaming & Levelling action of D'FOAM AP LGK contributes to production of better printing surface on the coated sheets.

Benefits

D'FOAM AP LGK is a 52 % active product and performs tremendously in controlling foam generation in coating systems based on synthetic Latex Emulsion

It extends excellent brushability and does not cause fish eyes, thereby not affecting the finished product.

As it is water soluble , it can be used without danger of causing grease spots or fish Eyes. It lowers the viscosity of typical casein clay coating colours, which makes the Application of higher solid coatings possible in existing equipments.
