

**Epoxy Paints & Coatings**

---

**Typical chemical and physical Properties**

**D'FOAM AP W 0530** is an antifoam formulation for Epoxy paints & coatings, adhesive, working as effective de-aerating agent. It eliminates detrimental effects like Cratering, pin holes, blisters.

**Combination of organo-modified silicones and foam destroying polymers**

PROPERTIES:

Appearance	Yellowish liquid
Flash Point	> 90 C
Density	> 0.80
pH	5.5 - 7.3
Solubility	Water Dispersible

---

**Applications and typical treat level recommended**

0.5 to 2.5 % based on total weight.

Apply the product in its natural state by aspersion or by dosing pump and adjust the initial dosage according to the requirements. It can be added at any stage of the production .

**D'FOAM AP W 0530** when used during manufacture and application of epoxy resin system, makes the system defect free and smooth surface are achieved.

---

**Benefits**

**D'FOAM AP W 0530** exhibits excellent defoaming and de-aerating properties without imparting any negative effects on the surface .

**D'FOAM AP W 0530** leaves no residues in the pipes or valves of the equipment used.
