
Typical chemical and physical Properties

D'FOAM BIL 080 T is a versatile antifoam formulation for pulping, brown-stock - washing paper machine, waste-water treatment and various general chemical processing applications.

A Blend of Glycols, fatty acids, vegetable & petroleum wax and other surface active components

PROPERTIES:

Appearance	Thin milky paste
Ionic Nature	Non Ionic
Solubility	Soluble in water

Applications and typical treat level recommended

Paper Machine	1.5 to 3kg / tonne of paper
Waste Water Treatment	50 - 100 ppm

Dosage: Exact dosage can only be arrived at by conducting plant scale trials.

Pre-Dilution:

D'FOAM BIL080 T can be pre-diluted up-to 1:3 with water (water should be added to D'FOAM BIL 080 T (but not vice versa.).

D'FOAM BIL 080 T may also be distributed with a water dilution system and or with a special metering system for automatic dosing in any system, which means product will automatically added only when needed.

Benefits

D'FOAM BIL 080 T is a very active product and performs tremendously in controlling foam generation.

It offers tremendous cost benefit due to high dilutability

It leaves no significantly adverse impact on B.O.D / C.O.D values and maintains these within permissible parameters.
