

PAPER MAKING

Typical chemical and physical Properties

D'FOAM BIL 35 PM is a revolutionary antifoam formulation dedicated for Paper - making.

A Proprietary blend of vegetable and hydrocarbon waxes with glycol-based esters and is free from mineral oil content.

PROPERTIES:

Appearance	Milky paste
Active content	35 ± 2%
Specific gravity at 25 °C	approx. 1.00 g/cm ³

Applications and typical treat level recommended

Paper Making

150 -300 grams / tonne of paper

Apply the product in its natural state by aspersion or by dosing pump and adjust the initial dosage according to the requirements.

D'FOAM BIL 35 PM may also be distributed with a water dilution system and or with a special metering system for automatic dosing in the fermentation, which means product will automatically added only when needed.

Benefits

D'FOAM BIL 35 PM is a 35% active product and shows excellent performance in the control of foams by significantly reducing the entrained air content.

It is very effective even at low concentrations and facilitates smoother pump operation, transport.

TIPAP PMDC leaves no residues in the pipes or valves of the equipment used.
