
General Purpose

Typical chemical and physical Properties

D'FOAM BILS0305 is a silicone-based defoamer catering to multiple applications across wide spectrum of applications such as industrial cleaning, waste water treatment etc.

A Blend of polydimethyl siloxane, silica, polyether silicones and surfactants

PROPERTIES:

Appearance	Milky liquid
Solid content (%)	3.5 ± 0.5
Diluent	Water
pH	7.5 ± 1.0
Specific Gravity	approx. 1.00
Ionicity	Non-Ionic

Applications and typical treat level recommended

Dosage 50ppm to 100ppm

Exact dosage can only be arrived at by conduction a plant scale trial.

It is recommended to use **D'FOAM BILS 0305** in its natural state .. Concentration can be adjusted according to the stubbornness of foams.

D'FOAM BILS0305 may also be distributed with a water dilution system and / or with a special metering system for automatic dosing, which means product will be automatically added only when needed.

Benefits

D'FOAM BILS 0305 performs tremendously in controlling foam generation in general chemical processing applications such as industrial cleaning, waste water treatment etc.

It is very effective even at low concentrations and facilitates smoother pump operation, transport.

D'FOAM BILS 0305 leaves no residues in the pipes or valves of the equipment used.
